Healthier Cleaners for your home!

Most cleaning products do not list all ingredients, making it difficult to tell the good from the bad. Products labeled with "green" or "all natural" do not guarantee a safer product!

Chemicals in cleaning products can pollute indoor air and cause health problems for both you and your children.

What to Avoid:

Ammonia:

1. Irritates the eyes and lungs
2. Linked to kidney and liver problems
3. Reacts with bleach to form poisonous chlorine gas

Bleach:

1. Irritates eyes, skin, and lungs
2. Can be fatal if swallowed

Phthalates:

1. Carry fragrance in cleaners, deodorizers & laundry products
2. Can cause airway inflammation
3. Can cause reproductive problems

What can you do?

Avoid cleaners marked "danger" or "warning"

Never mix cleaners together- you could create a dangerous chemical reaction

Call the manufacturer and ask which chemicals they use. Tell them you prefer non-toxic cleaners

Look for commercial products containing the third-party certified "Green Seal" label
